

Human Factors for Modern Healthcare: Designing Work that Works

April 9 and 10, 2026
Washington, DC

A rigorous 1.5-day workshop that will teach you to:

- Apply human factors engineering to reduce medical errors and improve patient safety
- Evaluate workflows and cognitive demands to identify where systems exceed human capacity
- Safely integrate new technologies and AI by analyzing tasks, decision-making, and situation awareness

Who should attend?

- Patient safety and quality leaders
- Risk managers, malpractice insurers, and healthcare safety professionals
- Industry professionals, device manufacturers, and health IT developers
- Clinicians of all specialties, including nurses, pharmacists, therapists, APPs, physicians, and students
